

NEC to implement NERCORMP at Arunachal Pradesh

The North Eastern Council (NEC) has planned to implement the North Eastern Community Resource Management Project (NERCORMP) in

Tirap and Changlang districts of Arunachal Pradesh. This project is to provide supplementary income to the families through the SHGs, with the involvement of the local communalities in the State of Arunachal Pradesh. The Centre has decided to expand the projects

to all the districts with an effective manner.

The Tata Consultancy Services (TCS) has also been engaged for preparing a tourism master plan for the North -East region to project its vast potential as a single unit to the rest of the world.

For the implementation of the project though the ministry takes up planning, execution and monitoring of various schemes, but huge allocation (10% of each ministry allocated to the NE) remain unspent and diverted to the Non-Lapsable Central Pool of Resources (NLCPR) from which the Planning Commission allocates funds for projects prioritized by the respective State Government.
