

Online education portal launched

GUWAHATI, March 18 – Eminent educationist Dr Hiren Gohain inaugurated the online education portal of Assam Down Town University at Hotel Brahmputra Ashok on March 15, a press release stated.

This system is based on the methodology of 'anytime and anywhere learning'. Flexibility and freedom offered to students gives this form of learning an edge over classroom learning. It offers a world without boundaries, facilitating study while saving time, money as well as the need for travel. The programmes cater to self-moti-

vated learners, who are bound by time or career responsibilities.

It provides the chance for working professionals, housewives, defence personnel or even students who are looking for an additional qualification to learn and get the much desired qualification which they cannot avail via classroom learning due to lack of time or opportunities.

As the growth of the internet is increasing and penetration is reaching even interior places, where colleges and educational institutes are not present, or do not offer the required quality of educa-

tional opportunities, online educational provides an efficient alternative. Even when other online education programmes in India are still nascent, Assam Down Town University (ADTU) is planning to set a benchmark in this field.

The Assam Down Town University was set up with an ambition to introduce and start employment-oriented professional courses in the region. New and unique teaching methodology, besides new courses are being introduced and developed. In this quest the University while striving towards virtu-

al education launched aduonline.edu.in.

With the aim of offering the best in education with cutting edge technology, ADTU is collaborating with UTS Ltd. from Pune to launch specialised management and technical E-programmes UTS Ltd is an online service provided and an open bridge of learning. The company has adopted Blackboard, which is the most advanced and efficient learning management system software in the world. The company has been functioning under leadership of Dr Sunil Karad and fellow directors of MIT Group of Pune.
